DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

The Title has been changed to: "Liquid crystal display module having different numbers of securing points to secure optical sheet to support".

End of examiner's amendment.

Allowable Subject Matter

2. Claims 1-7 and 10-12 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the liquid crystal display module of claim 1, in particular the limitations that the number of securing points disposed to engage the first diagonal line (having a high thermal expansion coefficient) is different from a number of securing points disposed to engage the second diagonal line (having a low thermal

Art Unit: 2871

expansion coefficient). Claim 1 is therefore allowed, as are its dependent claims 2-7 and 10-12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,552,761 to Seo *et al.* discloses a method securing optical sheets to a support to prevent wrinkling.
